

BRUNNINGS GARDEN PRODUCTS
PRODUCT GUIDE

COW MANURE

Introduction

- Cow manure is nature's original soil conditioner.
- Brunnings Cow Manure is a high quality product which has been properly composted to minimise smell and improve texture.
- A natural organic material which is an ideal for adding to light, sandy soils or heavy soils lacking in organic matter.
- Promotes vigorous, healthy plant growth.
- Suitable for all trees, shrubs and gardens.

Available in 5, 10 and 25L sizes.

Key Benefits

- Enhances the development of the root system by improving soil structure.
- Increases water penetration and reduces water run-off in clay soils.
- Improves soil aeration and water retention in sandy soils.
- Increases soil humus.
- Requires less frequent irrigation.
- Provides a natural source of nitrogen for greening, leaf and stem development.
- Reduces the loss of nutrients from the soil.
- Lifts the activity of micro and macro organisms in the soil.
- Enhances earthworm activity.

For Best Results

Cow manure is most effective when dug into the soil when preparing garden beds, or when spread around plants and raked in.
