

BRUNNINGS GARDEN PRODUCTS
PRODUCT GUIDE

GYPSUM CLAY BREAKER

Introduction

- A soil conditioner that helps to break up heavy clay soils, and make them more workable.
- Improves the soil structure and drainage of heavy to clay soils.
- Also adds calcium and aids aeration to the top soil.
- Ideal preparation when planting or renovating lawns and garden beds.
- Lasts for years.

GENUINE NATURAL MINERAL GYPSUM not a chemical by product.

Available in 10kg and 25kg sizes.

When Should I Apply

Brunnings Gypsum Clay Breaker should be applied when planting or renovating lawns and garden beds as it helps to break up heavy clay soils, improves structure and drainage, adds calcium and aids aeration to top soil.

How Much Do I Use

- Dig the soil to a depth of 10-15cm, making sure to break up any large clods.
- Apply **Brunnings Gypsum at the rate of 1kg per square metre**, and rake or dig into soil.
- **If soil consists of very heavy clay** you may need to apply 2kg per square metre.
- **If the soil is dry**, be sure to water in well after application.

Active Ingredients

21.0% Calcium (Ca) as Sulphate
17.0% Sulphur (S) as Sulphate
99% GYPSUM PREMIUM GRADE

Friendly Hints and Cautions

- *IF SOIL IS DRY, WATER IN WELL AFTER APPLYING.*
- *DOES NOT AFFECT SOIL ACIDITY*
- *THE APPLICATION RATE SHOULD BE FOLLOWED TO AVOID CREATING A SLURRY*
