

BRUNNINGS GARDEN PRODUCTS
PRODUCT GUIDE

ORGANIC GARDEN SOIL

Introduction

- **Brunnings Organic Garden Soil is a rich blend of organic material composted to become a rich humus.**
- **Is perfect for new garden beds and topping up gardens.**
- **Contains many of the essential food nutrients necessary for plants as well providing a healthy medium for micro and macro organism activity.**

For Best Results

Garden Beds:

After removing weeds and rocks, turn over the soil lightly to break up the compacted surface. Build up all garden beds using Brunnings Garden Soil to a level which allows excess water to run off.

Fertilise around the plants with a quality fertiliser such as *Nitrophoska Slow Release* and re-water.

Prior to Planting:

Place soil at the bottom of the hole up to 20cm thick and soak deeply with water. Plant in accordance with growers instructions and fill in using more Garden Soil. For additional nutrients we recommend you sprinkle in **Brunnings Blood & Bone**, mix with the soil and again soak deeply.

Organic Vegetable Gardens

Brunnings Garden Soil is a natural organic product which makes it the natural perfect medium in which to grow healthy vegetables organically.

Friendly Hints & Cautions

- *DO NOT CULTIVATE OR TURN OVER THE SOIL AFTER USING ORGANIC GARDEN MULCH, AS THIS WILL BREAK THE DELICATE ORGANIC BONDS IN YOUR SOIL WHICH ARE VITAL FOR WATER AND NUTRIENT STORAGE.*
- *MAINTAIN YOUR HEALTHY SOIL BY REGULARLY TESTING THE SOIL FOR pH AND TREAT ACCORDING TO RESULTS OBTAINED.*
