PRODUCT GUIDE

PINE BARK

Introduction

- **Pine Bark is perfect for mulching all low maintenance garden areas, woody trees and shrubs and established plants.**
- **Pine Bark protects soil from heavy rain, reducing erosion and helps to slow down weed growth.**
- **Ideal potting medium for Cattleya and Dendrobium Orchids and other Epiphytes.**
- **Pine Bark has an open texture which absorbs and conserves moisture yet gives perfect drainage through pots.**
- **Pine Bark insulates to keep soil cooler in Summer and warmer in Winter.**

Available in 40 and 70 litre sizes.

For Best Results

- Pine Bark should be applied from mid to late spring.
- Before applying, remove all weeds and water the soil or garden bed thoroughly.
- Apply a layer of Pine Bark at a thickness of approx 50-75mm. Water thoroughly to stabilise the Pine Bark. Reapply as needed, once or twice a year.

Friendly Hints & Precautions

When applying Pine Bark to gardens with trees, leave a space around the tree trunk, making sure you cover the drip line.
