

BRUNNINGS GARDEN PRODUCTS
PRODUCT GUIDE

SULPHATE OF AMMONIA

Introduction

- ***Brunnings Sulphate of Ammonia is a rich nitrogen fertiliser which encourages and stimulates leaf growth in plants and lawns.***
- ***Promotes healthy leaf growth, greening & citrus tree development.***
- ***Sulphate of Ammonia is ideal for :***

Lettuce, cabbage, onions, tall trees, bananas, palms, lawns, acidifying alkaline soils & rectifying nitrogen deficiency.

- ***Is fast acting.***
- ***Can be applied dry or in soluble form for a more even result on lawns.***
- ***It is also effective for most plants with yellow-leaf symptoms.***

Available in 2.5kg, 5kg, 10kg and 25kg sizes.

Analysis

21.0% Nitrogen (N) as Ammonium
23.6% Sulphur (S) as Sulphate

For Best Results

For General Use:

Apply 15g per square metre evenly over the surface and water in well.

For Flowers and Small Shrubs:

Apply as a side dressing at 30g per square metre, at least 5cm on either side of the plant. Cover with soil and water in well.

For Leaf Crop Vegetables:

Apply 30g per square metre at thinning out stage and then every three weeks after applying.

Friendly Hints and Cautions

- WASH OFF any fertiliser off foliage and water in well if applying dry.
- To make liquid fertiliser dissolve 30g in 5 litres of water in a watering can and spread evenly over 2 square metres.
