- **Open medium to ensure adequate draining.**
- **Ideal mix for :**

Azaleas, Camellias, Hydrangea, Gardenias, Daphne, Rhododendrons, Lily of the Valley and other acid loving plants.

Available in 30 litre size.

For Best Results

Re-potting:

- Water the plant in its old pot and allow to drain.
- Select a thoroughly cleaned pot 25–50mm wider than the original.
- Cover the bottom of the new pot with stones or crock, adding some Brunnings Charcoal.
- Add some Azalea & Camellia Potting Mix to the pot.
- Remove plant from old pot, position it in the new pot and fill with potting mix to within 20mm of the top of the pot and firm down gently.

Watering:

After re-potting, water thoroughly. Allow to drain.

Handy Hint

- *Mix water with Brunnings Easy Wetta to ensure mix is uniformly moist. Thereafter, water whenever the surface feels dry to the touch.*
- *Place Brunnings Sphagnum Moss around the top of pots to reduce moisture loss due to evaporation.*

Feeding:

Plants need regular feeding to sustain vigorous growth and to promote strong root development. After the first month, commence feeding with Nitrophoska Slow Release Fertiliser for feeding up to 4 months or Brunnings Azalea & Camellia Food.
