

BRUNNINGS GARDEN PRODUCTS
PRODUCT GUIDE

POTTED COLOUR & SEEDLING MIX

Introduction

- Ideal planting mix for Petunias, Pansies, Impatiens, Seedlings and other Potted Colour.
- Premium organic planting mix for superior growth
- Contains slow release fertiliser and soil wetting granules.
- Complies with the requirements of the Australian Standards for premium potting mixes.
- Provides an open medium to insure adequate drainage and is easy to re-wet as it contains water saving granules.

Available in 25L size.

For Best Results

Planting for best results:

When planting potted colour ensure plants are well watered prior to planting. Handle plants gently to avoid any damage to the root ball. Partly fill the new container or prepared garden bed with the mix. Remove the plant from its container and place into position. Fill remaining area with the Potted Colour & Seedling Mix and press down lightly, ensuring the entire root ball is covered and just below ground level.

Watering:

After planting, water in thoroughly to fully wet the mix and settle the planting area.

Top dressing pots:

Place Brunnings Sphagnum Moss around the top of the pot to reduce moisture loss due to evaporation. Alternatively a quality mulch like Brunnings Easy Wetta Mulch could be used.
